ABOUT ME

I born loving to explore, to know all the details, to discover the unknown, moreover addicted to technology and techniques. It was a great moment for my family since I was a child to experience all-new events even if it is only touching a keyboard. After the voyage in computer searches and mastery of all its details at the level of hardware and software, I decided to go into a new experience in the Web design, it was a big challenge for the young in 18 years old to learn it with the latest technologies, but Thanks to Allah I managed to add my mark on many projects till today. I found pleasure in this field and decided to sail in it and hone my skills to be always special and creative. And here I am moving to achieve new aims and to satisfy my ambitions and desires.

EXPERIENCE

Web & App Project Manager @TDS **May 2019 – Current**

I currently work with TDS as CTO. I have manage technical team in house and out sourcing, I have to analyze client requirement and draw the work flow and clarify it with development and design team
